SMERALDINA ARTESIAN WATER. SIMPLY THE BEST.

Delizzos + Glisbò

**2019 Gold Medal Winner at the Berkeley Springs International Water Tasting,
the most prestigious water competition in the world.**

If you have never experienced it, maybe you are asking why Smeraldina has been voted the best mineral water on the planet. The reasons are many: Smeraldina comes from the island of Sardinia, in the center of the Mediterranean Sea, considered one of earth's most pristine ecosystems; it flows through the earth's oldest granite rocks reaching a depth of 1,000 feet below the mountain; after hundreds of years of its natural journey through the granite rock, emerges naturally filtered and with the perfect balance of minerals, ideal for the body's wellbeing. Smeraldina is bottled directly at the source, monitored more than 100 times per day in a laboratory that has received the highest level of quality certifications. Words cannot describe the incredible excellence of Smeraldina, nor can they explain why it has won the most prestigious water competition in the world. You simply need to taste it.

Pura gioia di vivere.
