

Lost Barrel Brewing

United States - Virginia

Lost Barrel Brewing was founded in 2020 as a small group to brew fresh, hand-crafted beer and hard seltzer that they could not find in retail stores to share with family and friends. They invested in world class equipment, research and development, and fresh ingredients that are meticulously tracked in a custom-built application. Every day they strive for quality, consistency, and variety. Lost Barrel Brewing is located on an historic horse farm in beautiful Middleburg, VA that dates back to the early 1700's.

At Lost Barrel Brewing they produce craft beer and hard seltzers in a custom-built facility that was constructed in 2020. The brewery consists of a state-of-the-art 15 BBL (450 gallon) brew system, temperature-controlled fermentation vessels, and 4-head canning machine capable of packaging 1,000 cans per hour. They use world-class water filtration equipment and environmentally friendly cleaners to ensure safety, consistency and quality in their products.
