

Kokki Sake Brewery

Kokki Sake Brewery is located in the Shimane Prefecture.

Kokki Sake Brewery was built after the Great Fire of Bunka 5 and still retains the atmosphere of a townhouse from the end of the Edo period. The sake brewery facing Lake Shinji was inherited from the Matsudaira family, the feudal lord of Matsue.

Kokki Shuzo uses the traditional techniques of the Izumo Toji clan to make sake, using authentic handmade methods with a traditional steamer, koji lid, koji box and sake tank.

Comes from "☐" ☐Japan and "☐" = The brightness of the sun
