

Parajes del Valle

Spain - Murcia

Viticulturists since 1982. Our family embarked on this adventure, responding to the desire to make sincere wines, with personality, that convey the purity of our land through sustainable viticulture. Effort, perseverance, and dedication have brought us here, while enthusiasm and passion drive us towards the future. In 2012, Parajes del Valle winery joined the group, located in Jumilla, with the purpose of continuing this project of making sincere and personality-filled wines.

From Parajes del Valle, we produce high-quality, elegant, and balanced wines, very expressive and tasty. They are honest and respectful of their typicity, carrying a high concentration of color and aromas and showing delicacy and complexity, a carefully crafted, authentic, and personal way of interpreting the varieties of the D.O.P. Jumilla and D.O.P. Manchuela. Our vineyards are certified by Organic Agriculture, grown in goblet training system and strict dry farming, rescuing traditional viticulture and minimizing impact on the environment. We advocate for minimal intervention, carrying out only the necessary tasks and caring for our vines so that they produce in a balanced way and provide us with the best raw material for our wines. Our plots are located at altitudes between 600 and 800 m, always seeking shady areas and proximity to the mountains to obtain fresh and balanced grapes.
